

Cookies Policy

Last updated: 18.09.2026

What we use and why

Cookies and similar technologies are small files or identifiers stored on your device to make a site work, remember choices, or measure usage. This policy explains what callSaul uses.

Cookies currently in use

Based on a scan of callsaul.io (2026-09-18): the site uses no cookies and no tracking. Specifically:

- **No analytics** cookies (no Google Analytics, PostHog, or similar).
- **No advertising or marketing** cookies, and **no ad pixels**.
- **No third-party tracking** cookies.
- **Only** the site's own **strictly necessary technical resources** are used to make it function.

Category	On callsaul.io	Purpose
Strictly Necessary	Minimal/Functional only	Load the site and its features
Preferences	None	-
Statistics/Analysis	None	-
Marketing	None	-

Managing your choices

Because callsaul.io uses no non-essential cookies, no consent banner is required. If we add analytics or any non-essential cookies in future, we will update this policy and add a consent mechanism before doing so. You can also control or clear cookies at any time through your browser settings.

Third-party cookies

None currently. If we later add a third-party tool that sets cookies, it will be listed here with a link

to that provider's policy. We do not use cookies to sell your personal data.

Changes

We will update this policy if the technologies we use change, with a new "last updated" date.
